

Dart Pistol TeleDart RD406

High accuracy quality dart pistol for distances up to 30 meters in an elegant pistol case including complete starter equipment

The TeleDart Pistol RD406 is the first dart pistol that matches in comfort and accoutrement with a high distance dart gun. For distances up to 30 m it meets all demands of the practice – safe and silent working, comfortable handling and good markmanship. It is understood that all TeleDart applicators comply with the most recent safety regulations.

We use only material resistant to corrosion with a high quality coating. The pistol grip is covered with hardwood. All functional parts are protected by the casing and integrated in the pistol body. We give you a 20-year guarantee on the function of the pistol. Of course, this pistol has a direct breech loading, an infinitely adjustable power supply, an easy readable pressure

gauge and a trigger with safety. Additionally you can easily add an optical sight of your choice.

The amply starter equipment includes Co2-cartridges, dart syringes and needles as well as all small parts necessary for the filling of the syringes. An elegant and practical pistol case completes the delivery.

Technical Data

Weight (with barrel)	~ 1,8 kg
Length (with barrel)	~ 85 cm
Barrel	caliber 11 (aluminium) or caliber 13 (carbon fiber) length: 80 cm
Range, maximum	50 m*
Range, effective	30 m (depending on the size of the dart syringe)
Caliber	11mm (additional caliber: 13mm)
Volume of dart syringes:	1cc – 5 cc (caliber 11mm) 5cc – 20 cc (caliber 13mm)
Pressure regulation	infinitely adjustable
Pressure supply	Co2-cartridges (16g/45g) or airpump (under construction)
Trigger	with trigger point and safety
Kinetic energy:	> 7,5 Joule

* Only very well-trained shooters should work at distances of more than 40 meters - the trajectory can be influenced by the weather (f.ex. wind). Experience and permanent training are inevitable.

Dart Pistol

TeleDart RD406

Guarantee:

20 years on the function

Safety aspects:

Power supply by a press button. The pressure can always be controlled at the manometer. An integrated safety valve prevents from over-pressurizing.

The safety of the trigger mechanism avoids unintentionally shooting.

Comfort of handling:

The dart syringe can be inserted directly into the pistol and is stationed exactly by the positioning pin.

The mounting of an optical sight of your choice is prepared.

Reliability and accuracy of shooting:

Well-chosen materials and solid workmanship are the base for good and constant shooting results. The pressure table added to the pistol give you a survey about the pressure needed to work without hurting the animal.

In any case, consider the weather conditions at any time. Wind and rain can influence the flight of the dart syringe.

Basic equipment:

Pistol with aluminium barrel caliber 11mm as well as:

- Co2-power regulation with cartridge holder for Co2-cartridges 16gr
- Direct syringe loading with positioning pin
- Easily readable manometer integrated in the housing of the pistol body
- Infinitely adjustable pressure regulation
- Prismatic rail for additional aiming devices included (telescopic sight or red dot)
- Aiming with backsight and foresight
- Different safety devices (such as pressure control valve, trigger block)
- First equipment set with 10 syringes, 10 needles, 10 Co2-cartridges and syringe filling parts
- Elegant pistol bag
- Instructions of use, pressure table and guarantee certificate

Additional equipment:

- Adaptor for Co2-cartridges 45 g
- Barrel 13 mm for dart syringes from 5cc – up to 20cc
- Telescopic sight Bushnell "Sportsman 3-9x 32" or red dot sight Bushnell "Trophy" 1 x 28
- Laser rangefinder Bushnell "Sport 450"
- Quick connector and adaptor for airpumps (under construction)
Télémètre laser

Guarantee time:

20 years on the function of the pistol

Import regulation for other countries:

European Union: preable import authorization following article 11 (3) of the directive 91/477/EWG, Article 10 (3) of the directive 93/15/EWG

All other countries: please check the import regulation with your local authorities
