# Primate Diet Canned

## Feeding Instructions

ZuPreem® Primate Diet Canned is formulated to be fed as the sole diet for Old and New World monkeys, great apes and other primates. A supplemental diet source of Vitamin C, such as one section of an orange per week per animal must be fed in addition to the diet. Any other supplement(s) may dilute the nutrient content and could upset the balance of this diet. Because of the complementary nutrient profiles, the canned diet can be mixed with ZuPreem Primate Diet Dry if a diet with a different texture or moisture content is desired, or for variety. Replace with fresh canned diet if food becomes dried out. Cover and refrigerate unused food in can for up to five days. If refrigerated, return the diet to room temperature prior to feeding.

Feed ZuPreem Primate Diet Canned free choice to non-obese prone animals. Otherwise, feed measured-meal quantities. Food consumption may vary between species and individuals of the same species. The correct quantity fed is one that maintains an appropriate body composition as assessed by the primate professional.

Marmosets and tamarins should be fed ZuPreem Marmoset Diet Canned.

**Note** – As an indicator of health, always monitor for changes in weight and body condition. Provide adequate amounts of food to maintain body condition, preventing excessive thinness or obesity.

Always provide clean, fresh water.

## Ingredients

Water, Cracked wheat, Whole egg, Soybean meal, Sucrose, Rice, Vegetable oil, Alfalfa meal, Iodized salt, Dicalcium phosphate, Calcium phosphate, Choline chloride, Ferrous sulfate, Zinc oxide, Copper chloride, Manganous oxide, Cobalt carbonate, Calcium iodate, Sodium selenite, Vitamin A supplement, Vitamin D<sub>3</sub> supplement, Vitamin E supplement, Thiamine, Niacin, Calcium pantothenate, Pyridoxine hydrochloride, Riboflavin, Folic acid, Biotin, Vitamin B<sub>12</sub> supplement.
